Hi,

I installed deluge from the repository on CentOS7 and I have an issue as it does not start:

deluged

```
[root@vn ~]# [ERROR ] 14:10:54 main:237 dynamic module does not define init function (initlibtorrent)
```

Traceback (most recent call last):

```
File "/usr/lib64/python2.7/site-packages/deluge-1.3.12-py2.7-linux-x86_64.egg/deluge/main.py", line 230, in start_daemon
```

```
    Daemon(options, args)
```

```
File "/usr/lib64/python2.7/site-packages/deluge-1.3.12-py2.7-linux-x86_64.egg/deluge/core/daemon.py", line 136, in __init__
```

```
    from deluge.core.core import Core
```

```
File "/usr/lib64/python2.7/site-packages/deluge-1.3.12-py2.7-linux-x86_64.egg/deluge/core/core.py", line 36, in <module>
```

```
    from deluge._libtorrent import lt
```

```
File "/usr/lib64/python2.7/site-packages/deluge-1.3.12-py2.7-linux-x86_64.egg/deluge/_libtorrent.py", line 59, in <module>
```

```
    import libtorrent as lt
```

```
ImportError: dynamic module does not define init function (initlibtorrent)
```

It complains about the libtorrent which was also installed from the repository as a dependency.
