
Subject: Nux on CentOS7

Posted by [SpaceBack](#) on Wed, 09 Jul 2014 13:10:17 GMT

[View Forum Message](#) <> [Reply to Message](#)

How can I add this repository my system ? Just installed CentOS 7 and I like it very much but I need some more apps for daily tasks.

I managed to add the elrepo and nux repository but it seems it's still not ready for use.

Hi,

So which command exactly triggered that error message?

[View Forum Message](#) <> [Reply to Message](#)

yum install mplayer

the same goes for vlc and skype when I tried to install them.

[View Forum Message](#) <> [Reply to Message](#)

Oh, right, you don't have the full repo added. Here's how, as root do:

yum install

http://li.nux.ro/download/nux/dextop/el7/x86_64/nux-dextop-release-0-1.el7.nux.noarch.rpm

yum install vlc mplayer

That should finish successfully.

Ok, so you have my repo enabled, then I don't get what the problem is.

Can you try "yum install mplayer vlc" and paste here all the output? Also, please do a "yum repolist"

You could try using --skip-broken to work around the problem
You could try running: rpm -Va --nofiles --nodigest

```

```

[root@localhost mihajlovic]# yum repolist
Loaded plugins: fastestmirror, langpacks
Loading mirror speeds from cached hostfile

```

Ok, I don't know why this is happening, I will install a fresh VM with CentOS 7 LiveCD and attempt to install mplayer and vlc, this should clear up things a bit.

Hi,

I just booted a fresh CentOS 7 Gnome live Cd and everything went great. Here's the log:
<http://pastebin.com/raw.php?i=QsvTLgs8> (also attached)

Do you remember having installed other repos previously?
Can you send me the output of:
rpm -qi libva
rpm -qi libvdpau

just installed this
rpm -Uvh http://dl.fedoraproject.org/pub/epel/beta/7/x86_64/epel-release-7-0.2.noarch.rpm
and everything is working now. i dont know what i did to screw it up but it works now. thank you very much :)

update: vlc installed but apps like deluge or skype wont. it shows the same error like before.

```
[mihajlovic@localhost ~]$ rpm -qi libva
```

```
Name      : libva
```

```
Version   : 1.2.1
```

```
Release   : 3.el7
```

```
Architecture: x86_64
```

```
Install Date: Thu 10 Jul 2014 10:09:14 AM CEST
```

```
Group     : System Environment/Libraries
```

```
Size      : 180994
```

```
License   : MIT
```

```
Signature : RSA/SHA256, Thu 03 Jul 2014 04:21:09 PM CEST, Key ID 6a2faea2352c64e5
```

```
Source RPM : libva-1.2.1-3.el7.src.rpm
```

```
Build Date : Mon 30 Jun 2014 06:36:54 PM CEST
```

```
Build Host : buildvm-04.phx2.fedoraproject.org
```

```
Relocations : (not relocatable)
```

```
Packager  : Fedora Project
```

```
Vendor    : Fedora Project
```

```
URL       : http://freedesktop.org/wiki/Software/vaapi
```

```
Summary   : Video Acceleration (VA) API for Linux
```

```
Description :
```

```
Libva is a library providing the VA API video acceleration API.
```

```
[mihajlovic@localhost ~]$ rpm -qi libvdpau
```

```
package libvdpau is not installed
```

i had elrepo but i removed it just now.

Elrepo should be fine, re-enable it.

I think you are missing EPEL, not sure how I missed this earlier. This should fix the problem:

```
rpm -Uvh http://dl.fedoraproject.org/pub/epel/beta/7/x86_64/epel-release-7-0.2.noarch.rpm
```

i already added that repo. see post above.

```
[root@localhost mihajlovic]# yum repolist
```

```
Loaded plugins: fastestmirror, langpacks
```

```
Loading mirror speeds from cached hostfile
```

```
* base: mirror.telepoint.bg
```

- * elrepo: mirrors.neterra.net
- * epel: mirrors.neterra.net
- * extras: centos.mirrors.linux.ro
- * nux-dextop: mirror.li.nux.ro
- * updates: centos.mirrors.linux.ro

repo id	repo name	status
base/7/x86_64	CentOS-7 - Base	8,465
elrepo	ELRepo.org Community Enterprise Linux Repository - el7	30
epel/x86_64	Extra Packages for Enterprise Linux 7 - x86_64	4,673
extras/7/x86_64	CentOS-7 - Extras	30
nux-dextop/x86_64	Nux.Ro RPMs for general desktop use	696
updates/7/x86_64	CentOS-7 - Updates	316
repolist: 14,210

Ok,

So now VLC and mplayer work. Skype is a known issue that I am working on right now. Thanks for letting me know about Deluge, I'll try to allocate some time for it as well. Can't you use Transmission in the meantime?
