Hello,

As announced in <https://lists.fedoraproject.org/pipermail/epel-announce/2014-November/000032.html> there might be quite a significant package removal from EPEL, possibly causing dependency problems for nux-dextop as well.

If that happens and you notice it, then please post in the appropriate forum and I'll try to adopt these packages so things will still go smoothly.

Thanks :)
