Hi,

Thanks for maintaining this repo, it's great to be able to add a few extra bits to a stable CentOS base.

I'm setting up MythTV on CentOS and was wondering now Stephen Collier at scrpms.net is building MythTV too whether you were going to continue to update the MythTV packages?

Hello,

I am not aware of this repo. Can you give me more info?
I'll gladly pull it from my repo if someone is actively working on it.

I think Stephen is providing some bits since atrpms went quiet.

Thanks!
Have you tested if his repo conflicts with mine by any chance?
Also, do you need mythtv for el6 or 7?

I haven't tested it yet because I'm still cloning my disks.

I'm going to be installing on el7.
