Hi All

I'd like to create a local mirror of the nux desktop repo and possibly others for personal user.

Is there a way you could set up rsync on the server to make this possible?

Many Thanks

Hi,

Sure

```
rsync -av li.nux.ro::li.nux.ro/nux/dextop/ /path/to/local/dir
```

Absolutely spot on!

Thank you very much
