It appears that there is a package of ffmpeg2theora on EL6, but not EL7. The ffmpeg2theora project just released a new version this year that seems to support the version of ffmpeg in the EL7 repository, version 0.30.

Could you throw together a quick package for it please?

Hi,

The EL6 package seems to have build fine. Can you check functionality?

I'll look at upgrading it to 0.30.

Ok, pushed 0.30 as well, let me know if you hit any issues.

Great, thanks! Looks like it's working on our systems.
