---

I tried to yum install vlc and I got these:

--> Finished Dependency Resolution

You could try using --skip-broken to work around the problem

You could try running: rpm -Va --nofiles --nodigest

Any idea?

Hi

It doesn't seem related to vlc, I'd try to make sure elrepo is enabled, then run a 'yum clean all' and then 'yum update'. If all goes well then try to install vlc again.
