I was wondering if you would update tac_plus/tacacs+ from shrubbery.net in an rpm for CentOS 7?

Trying to get it working with FreeIPA.

THANKS!

Hm, their FTP server is down.

I'll see whether I can just rebuild the EL6 SRPM on EL7.

Can you try to install it from here and let me know whether it works as expected or not?

http://li.nux.ro/download/nux/tmp/tac_plus7/

Will try! If you could do it for CentOS that would be awesome!

Getting this error:

```
/etc/init.d/tac_plus status
/etc/init.d/tac_plus: line 22: [: =: unary operator expected
Unit tac_plus.service could not be found.
```

Use `service` command, i.e.

```
service tac_plus start  
service tac_plus status
```

etc

that worked. I can get it working with the RPMs you have for el6.

This is showing up in /var/log/messages

```
Jun 13 21:43:41 asm-rancid01 systemd: Stopping LSB: TACACS+ server based on Cisco source  
release...

Other than that, does it work as expected?

You can also comment out that line 22, it just checks (old sysvinit style, hence the error) if the network is up.

Nux

Thanks a lot for making tac_plus RPM from shrubbery. Do you happen to have a RPM based on the tac_plus code 4.0.4.28. It has lot of bug fixes that we can benefit from

Appreciate maintaining this rpm among others!

Hi,

Can you try the one from here and let me know if it works ok?
