Hey! Whats up?

The newest version of Darktable has a bunch new features and bug fixes. Is it possible to update to version 2.2.5? Currently the epel repo provides us the 2.0.7, kind of outdated. Thanks

Hi,

My policy is to never overwrite EPEL, so I am not sure I can help you in this instance. Best thing to do is to open a bug with EPEL and request an update.

Oh sorry, my bad!

I'll try to get in contact with EPEL team for that request

Thank you for your response
