It worked fine several days ago, but now I got the error:

```
---> Package ufwraw.x86_64 0:0.20-2.el7.nux will be installed
--> Processing Dependency: libexiv2.so.12()(64bit) for package: ufwraw-0.20-2.el7.nux.x86_64
--> Finished Dependency Resolution
Error: Package: ufwraw-0.20-2.el7.nux.x86_64 (nux-dextop)
        Requires: libexiv2.so.12()(64bit)
You could try using --skip-broken to work around the problem
You could try running: rpm -Va --nofiles --nodigest
```

The libexiv2 package gives the so.26 version now:

```
[centos@test-centos~]$ sudo rpm -ql libexiv2
/usr/lib64/libexiv2.so.26
/usr/lib64/libexiv2.so.26.0.0
```

It was updated recently:

```
Name      : libexiv2
Arch      : x86_64
Version   : 0.26
Release   : 3.el7
Size      : 2.9 M
Repo      : installed
From repo : base
Committer : Jan Grulich <jgrulich@redhat.com>
Committime : Fri Feb 23 13:00:00 2018
Buildtime  : Wed Apr 11 09:52:35 2018
Install time: Fri May 11 19:40:50 2018
```

Yes, I need to upgrade a few packages as CentOS 7.5 is out. I'll do it today.
