Hello,

It looks like the current mythtv-libs rpm needs to be updated to work with the latest CentOS release:

--> Finished Dependency Resolution

Error: Package: mythtv-libs-29.0-1.el7.nux.x86\_64 (@nux-dextop)

Requires: libexiv2.so.12()(64bit)

Removing: exiv2-libs-0.23-6.el7.x86\_64 (@base)

libexiv2.so.12()(64bit)

Updated By: exiv2-libs-0.26-3.el7.x86\_64 (base)

~libexiv2.so.26()(64bit)

You could try using --skip-broken to work around the problem

If you need any further information, please let me know.

Thank you!

I've rebuilt the package, you should see an update if you clean your yum cache, let me know if you hit any more issues.
