Hi Nux

Your repos are a great resource. Hope you can keep maintaining them.

The okular package in CentOS is way outdated.

Please, might it be possible to include a later version in your C7 repo ?

There's been significant development of Okular in past 5 years !

TIA's

Hello,

Unfortunately never messing with Base (or EPEL) packages is one of the founding principles of my repo, so I cannot do that for you.

Also, if it makes it any easier to accept, I believe Okular depends quite heavily on KDE so without a newer KDE stack as well it's likely it won't build on EL7.

Thanks v much for your reply and advice. Noted.

Maybe I'll need to consider switching to Kubuntu. :?

If you're an RPM guy I hear Fedora is very nice these days.
