[View Forum Message](#) <> [Reply to Message](#)

RHEL 7.6 updates freetype to 2.8. This breaks cairo when freetype-freeworld is installed:

[root:~]

You need to install the python bindings for gobject, gtk and pango to run Terminator.

Traceback (most recent call last):

```
File "./terminator", line 36, in <module>
    import gtk, pango, gobject
File "/usr/lib64/python2.7/site-packages/gtk-2.0/gtk/__init__.py", line 40, in <module>
    from gtk import _gtk
ImportError: /lib64/libcairo.so.2: undefined symbol: FT_Get_Var_Design_Coordinates
```

I don't have access to RHEL, so I'll need to wait until CentOS adds the updated freetype in CR repo or CentOS 7.6 is released.
Alternatively, if you can provide freetype (S)RPMs that I could try to build against, that'd be great.

Do you use Docker? I use the RHEL images in Docker containers for my latest builds:

<https://github.com/chrisjschultz/docker-rhel7-rpm-build-image>

The docker file installs dependencies I need, and adds pip for extra python stuff. Should be easy enough to tailor. You pass in your rpmbuild dir as a mount.

Hi,

I use mock for building packages, works very well.

So.. do you have the freetype packages?

Hi

I uploaded the SRPM (and yum config for rhel7.6) to the following repo.

<https://github.com/chrisjschultz/rhel7-srpms>

Cheers

Chris

Hi Chris,

Thanks, I've built a newer version of freetype-freeworld against the freetype you supplied.

If you could test it, that'd be great:

<http://li.nux.ro/download/nux/tmp/freetype-freeworld7/>

Hi

I installed the new freetype-freeworld RPM but I am still getting the same issue. I didn't install your new freetype RPM but I don't believe that is required.

.[root:~]

You need to install the python bindings for gobject, gtk and pango to run Terminator.

```
Traceback (most recent call last):
  File "./terminator", line 36, in <module>
    import gtk, pango, gobject
  File "/usr/lib64/python2.7/site-packages/gtk-2.0/gtk/__init__.py", line 40, in <module>
    from gtk import _gtk
ImportError: /lib64/libcairo.so.2: undefined symbol: FT_Get_Var_Design_Coordinates
[root:~]
[root:~]
freetype-2.8-12.el7.x86_64
freerdp-libs-1.0.2-15.el7.x86_64
freerdp-plugins-1.0.2-15.el7.x86_64
freeglut-3.0.0-8.el7.x86_64
freerdp-1.0.2-15.el7.x86_64
freetype-freeworld-2.6.5-6.el7.nux.x86_64
```

Hello everyone,
same problem on Oracle Linux 7.6. I've installed both freetype and freetype-freeworld from the URL provided by Nux but the issue is still present

@nux. Let me know if you need other (source) packages to test your fix

Thanks, Andrea.

```
kermit@euroforce:~ $ rpm -qa | grep freetype
freetype-2.8-12.el7.nux.x86_64
freetype-freeworld-2.6.5-6.el7.nux.x86_64
kermit@euroforce:~ $ tilix
object.Exception@./././dub/packages/gtk-d-3.8.2/gtk-d/generated/gtkd/gtkd/Loader.d(125):
Library load failed (libvte-2.91.so.0): /lib64/libcairo.so.2: undefined symbol:
FT_Get_Var_Design_Coordinates
```

Hi,

Can you two actually confirm the cairo breakage goes away once you uninstall freetype-freeworld?

If yes, can you please send the cairo SRPM from rhel 7.6 so I can build against it, as well?

Subject: Re: RHEL 7.6 breaks freetype-freeworld

[View Forum Message](#) <> [Reply to Message](#)

Hi Nux,
I can confirm the current workaround consist in uninstalling freetype-freeworld.

These are the cairo packages installed on my systems

```
kermit@normandy:~$ rpm -qa | grep cairo
pycairo-1.8.10-8.el7.x86_64
cairo-1.15.12-3.el7.x86_64
cairo-gobject-1.15.12-3.el7.x86_64
caiomm-1.12.0-1.el7.x86_64
```

I will provide the SRPMs as soon as possible

Thanks for your help!

[View Forum Message](#) <> [Reply to Message](#)

```
http://yum.oracle.com/repo/OracleLinux/OL7/optional/latest/x
86_64/getPackageSource/cairo-1.14.8-2.el7.src.rpm
```

I think you want this one (this is the version RHEL 7.6 installs).

[View Forum Message](#) <> [Reply to Message](#)

I've rebuilt freetype-freeworld against the new cairo.
The version has remained the same, so do a "rpm -e" or "yum clean all; yum reinstall".

<http://li.nux.ro/download/nux/tmp/freetype-freeworld7/>

Let me know if this fixes the issue.

[View Forum Message](#) <> [Reply to Message](#)

FT_Get_Var_Design_Coordinates is in the 2.8 version of Freetype.

The version of Freetype-freeworld you have built is 2.6, which is still missing
FT_Get_Var_Design_Coordinates.

I think we need to bump freetype-freeworld to freetype 2.8.

Hi,

Sorry for the wait, life got in the way.

Can you try http://li.nux.ro/download/nux/tmp/freetype-freeworld7/freetype-freeworld-2.8-12.el7.nux.x86_64.rpm ?

It's the exact same version I believe.

[View Forum Message](#) <> [Reply to Message](#)

Working well here too and gives a noticeable improvement over the stock library, thanks!

Please can you also build the equivalent 32-bit RPM as this seems to make a huge difference for apps running under under Wine?

Many thanks,

Bruce

Thanks for your work on this, much appreciated!

For me, Tahoma and other old skool M\$ fonts still weren't rendering correctly until I created a new file with the following, logged back in and I am working sweet as again!

```
[schultzch:~]  
export FREETYPE_PROPERTIES="truetype:interpreter-version=35"
```

[View Forum Message](#) <> [Reply to Message](#)

Thanks for the tip.
I'm tempted to include it in the RPM, but I am afraid it would be too invasive.

BTW, I am using fontconfig-infinality and freetype-infinality and am happy with how the fonts look.
Give it a try.
