Update to 7.7 attempts to update freerdp-libs-1.0.2-5 to freerdp-libs-2.0.0-1.rc4 which is probably an error.

Also Vinagre appears to pull in the later version.

Quick fix:

```
yum -x freerdp\* -x vingare\* update-minimal
```

I have an updated spec file for vlc 2.2.8 along with a patch that allows it to build. It was built against the packages in <http://li.nux.ro/download/nux/tmp/vlc7/> - Nux, if you want it, ping me on IRC or here. I also tried to build 3.x but that would require using devtoolset-7 gcc to compile it - 2.2.8 appears to be the last version that compiles on el7 without using SCL.
